

I-Board

Affordable interactive whiteboard

Ideal for:

- Schools / Universities
- Presentations
- Boardrooms
- Video conferences

Surface:

The I-Board has a white enamelled whiteboard surface, that can be used entirely in an (inter)active way.

Interactive screen:

together with a projector and a PC, your I-Board becomes an interactive touch screen: total control of your computer directly from the screen. The mimioMouse stylus acts as your mouse device.

Add notes and sketches to your presentation with virtual ink and save them for later use.

Perfect for interactive brainstorming or a convincing presentation of your PowerPoint slides.

Copyboard:

Everything you write or draw on your I-Board is captured in colour on your PC. If you push the button you can instantly make a copy to your printer. You can also edit the information further or send it e.g. to a Word document. The software even offers you export to a ready to use website.

You can use this copy board function to show on a huge projection screen what you write on your I-Board.

Design:

The I-Board has a straight finishing, fit to its use, with anodised aluminium profile with grey corner pieces.

2 in 1:

- (inter)active projection screen
- Huge enamelled whiteboard surface

Specifications:

- Dimension (inter)active surface: 1.8 x 1.2 m
- Different measures and versions possible
- Systems composed by several boards available.
- Equipped with build-in mimio technology

Detail

I-Board

Affordable interactive whiteboard

Interactive screen: when you connect the I-Board to your PC and projector, you can use it as a touch screen. With this touch screen, you can operate your computer entirely on the board. You can e.g. give a presentation in front of the board and have the possibility to make notes in virtual ink and save these notes. You can start up every application that is available on your PC by just touching the board.

Ideal in an education environment.

Colour copy board: Capture everything written and drawn on the I-Board, directly and in colour.

You can be sure all information is saved correctly without anyone making notes: effective en efficient.

Collaboration: What you write on the I-Board can be shown instantly over the Internet on any connected computer's screen with the free application Netmeeting.
