

I-Cabinet

Lockable interactive whiteboard

Ideal for:

- Schools / Universities
- Presentations
- Boardrooms
- Video conferences

Panels:

The I-Cabinet has 5 white enamelled whiteboard surfaces. The centre panel can be used in an (inter)active way.

Interactive screen:

together with a projector and a PC, your I-Cabinet's centre panel becomes an interactive touch screen: total control of your computer directly from the screen. The mimioMouse stylus acts as your mouse device.

Add notes and sketches to your presentation with virtual ink and save them for later use.

Perfect for interactive brainstorming or a convincing presentation of your PowerPoint slides.

Copyboard:

Everything you write or draw on your I-Cabinet's centre panel is captured in colour on your PC. If you push the button you can instantly make a copy to your printer. You can also edit the information further or send it e.g. to a Word document. The software even offers you export to a ready to use website.

You can use this copy board function to show on a huge projection screen what you write on your I-Board.

Design:

This special cabinet is nicely designed and well finished with an anodized aluminum profile black corner pieces.

3 in 1:

- (inter)active projection screen
- Huge enamelled whiteboard surface
- Flip-chart clip

Specifications:

- Dimension (inter)active surface: 1.6 x 1.2 m
- Total whiteboard surface 4,6x1,2 m
- Outer measures 1,6 x 1,2 m
- Flip-chart clip at right panel inner side
- Lockable with storage of all elements
- Equipped with built-in mimio technology
- Optional built-in projection screen

I-Cabinet

Lockable interactive whiteboard

mimio

Interactive screen: when you connect the I-Cabinet to your PC and projector, you can use its centre panel as a touch screen. With this touch screen, you can operate your computer entirely on the board. You can e.g. give a presentation in front of the board and have the possibility to make notes in virtual ink and save these notes. You can start up every application that is available on your PC by just touching the centre panel.

Ideal in an education environment.

Colour copy board: Capture everything written and drawn on the I-Cabinet's centre panel, directly and in colour.

You can be sure all information is saved correctly without anyone making notes: effective en efficient.

Collaboration: What you write on the I-Cabinet's centre panel can be shown instantly over the Internet on any connected computer's screen with the free Netmeeting application.
