

mimio Presentation Trunk

Portable interactive rear projection screen

Ideal for:

- Presentations on the spot
- Video conferences

Surface:

The screen consists of two anti-reflecting glass plates and, laminated between them, a holographic-optical foil. The projected picture is visible at vertically plus/minus 15° and horizontally plus/minus 35°.

Interactive screen:

Together with mimio Xi, a projector and a PC, your screen becomes an interactive touch screen: total control of your computer directly from the screen. The mimioMouse stylus acts as your mouse device.

Add notes to your presentation with virtual ink; save them for later use.

Perfect for convincing presentations wherever you are.

Copyboard:

Use your screen as an electronic whiteboard with the mimio software in full screen mode. Everything you write with virtual ink is captured in colour on your PC. Push the button and make a copy on your printer. You can edit the information further or send it e.g. to a Word document.

Design:

The Presentation Trunk comprises all elements in aluminium. Simplicity and usefulness are well met.

3 in 1:

- Portable rear projection screen
- mimio Xi system
- Portable interactive rear projection screen

Elements:

- Holographic screen, interactive surface: 81x61 cm or 101x76 cm
- Case for easy transportation
- Mount made of aluminium
- Stand for projector
- mimio Xi system

Trunk containing all elements

mimio Presentation Trunk

Portable interactive rear projection screen

mimio Xi
www.mimioenelux.com

Interactive screen: With mimio Xi mounted on the screen and connected to your PC, you can use the screen as a touch screen. You can operate your computer entirely on the screen. You can e.g. give a presentation in front of the screen and make notes in virtual ink and save them. Start up every application by just touching the board.

Ideal for interactive presentations wherever you are.

Colour copy board: Capture in color everything written or drawn on the screen using virtual ink and mimio software. Output as bitmap, HTML, movie.

You can be sure all information is saved correctly without anyone making notes: effective en efficient.

Collaboration: What you write on the screen with virtual ink and mimio software can be shown instantly over the Internet on any connected computer's screen with the free application Netmeeting.

Requirements: Windows system

- Pentium PC 166 Mhz, Windows 98/ME/2000 or XP
- 32 MB RAM (64 MB recommended), 15 MB hard disc space
- CD-ROM drive, USB port

Mac system

- G3, G4, iMac, PowerBook G4 or
- iBook, PowerBook G3
- 128 MB memory (physical RAM)

mimio Xi:

The mimio Xi system can still be used stand alone:

- Captures in color what is written on a whiteboard (2.4 x 1.2 m) or flip-chart without any additional equipment or cable. Ultra-portable (24 cm. 500 gr). The build-in memory lasts for 10 hours of meeting notes.
- Turns any smooth surface into an interactive touch screen (projector and computer needed).
- Project on a huge screen what is written and captured on a small whiteboard or flip-chart (with PC and projector).
- Comes with user-friendly software and documentation on CD.
- Free updates through www.mimio.com
