

# mimio EYEBOARD

Redefining presentation technology

## Ideal for:

- Presentations
- Boardrooms
- Trade shows
- Video conferencing
- Schools /
- Universities

## Screen:

The backlit 60" screen features a scratch resistant, anti-glare coating on a hardened glass screen. The special lens structure produces astounding vibrant and dynamic colours.

**Interactive screen:** **mimio EYEBOARD**, together with a projector and a PC, functions as an interactive touch screen: total control of your computer directly from the screen. The mimioMouse stylus acts as your mouse device.

Add notes and sketches to your presentation with virtual ink and save them for later use.

## Design:

**mimio EYEBOARD**, with its flexible, movable design and 4 wheels can easily and elegantly be placed where needed. It can simply be half folded to ease transportation.

## 3 in 1:

- Eyeboard rear projection screen
- mimio Xi system
- **mimio EYEBOARD** interactive rear projection screen

## Specifications:

- Display size 60 inches (120 x 90 cm)
- Tilt (adjustable) 90-80°
- Dimensions/weight 120 x 190 x 85 cm / 45 kg
- Universal mounting bracket

# mimio EYEBOARD

Redefining presentation technology

**Interactive screen:** Perfect for interactive brainstorming or a convincing presentation of your PowerPoint slides.

**Copyboard:** You can use your **mimio EYEBOARD** as an electronic whiteboard using the mimio software in full screen mode. Everything you write or draw on your screen with virtual ink is captured in colour on your PC. If you push the button you can instantly make a copy to your printer. You can also edit the information further or send it e.g. to a Word document. The software offers you many ways to export.

**Software:** **mimio EYEBOARD** uses the great mimio technology by Virtual Ink. For more information visit [www.mimio.com](http://www.mimio.com).

## System requirements:

### Windows

- Pentium PC 166 Mhz, Windows 98/ME/2000 or XP
- 32 MB RAM (64 MB recommended), 15 MB hard disc space
- CD-ROM drive, USB port

### Mac

- G3, G4, iMac, PowerBook G4 or
- iBook, PowerBook G3
- 128 MB memory (physical RAM)

## mimio Xi:

The mimio Xi system can still be used stand alone:

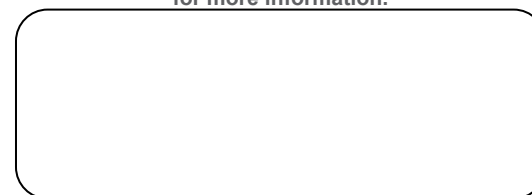

- Captures in color what is written on a whiteboard (1.2 x 2.4 m) or flip-chart without any additional equipment or cable. Ultra-portable (24 cm. 500 gr). The build-in memory lasts for 10 hours of meeting notes.
- Turns any smooth surface into an interactive touch screen (projector and computer needed).
- Project on a huge screen what is written and captured on a small whiteboard or flip-chart (with PC and projector).

All written information is instantly recorded without anyone to take notes, Get everyone on the same page: effectively and efficiently.

The system is very user-friendly, no training required.
